

PROSTOR P7

250X250 CM, 300X300 CM AND Ø350 CM, Ø400CM

CLOTHS

The Solero Prostor P7 wall parasol is available in three sizes: two square editions of 250cm and 300cm and a round version with a 350cm diameter.

No matter which size you choose, the P7 wall parasol is always easily handled. With the integrated gas spring supporting you, you'll open and collapse the parasol in a flash.

Despite of its size, the Solero Prostor P7 is very easy to move left or right. As the weight of this space saving parasol is smartly shared between the top and bottom rotating brackets, you'll instantly move the shadow to where you want it to be.

The canvas is 100% acrylic and is painted in mass, it weighs 290 gram per square meter and has a colorfastness of 7-8 on a scale of 8. Acrylic is water resistant and filters out 95-100% of UV radiation, expressed as UPF 50+. The canvas is washable and if necessary easy to replace.

The controls are extra light thanks to the steel gas spring that compensates the weight of the sunshade. Do you want to use the sunshade in a wet- or sea climate? Then the optional stainless steel gas spring is definitely recommended.

The framework for this sunshade is RAL 9007 by default, this is a gray structured lacquer. It's possible to get a black or white frame in case you need it, but this will have an additional cost and a longer lead time. You'll have the choice between RAL9007 (grey), RAL 9016 (white matte) or RAL 9005 (black, matte), Alucopper and Alupolished.

The Prostor P7 can be mounted to the wall with 2 adjustable brackets. The P7 wall sunshade has an optimal turn when mounted on a corner. The locking axis helps lock the sunshade down so it doesn't turn in the wind.

Move your sunshade around effortlessly thanks to the swiveling wheels with brakes, this is only available for the P7 Uno sunshade.

Optional for the Prostor P7 tile pedestal is an aluminum cover, lacquered in the pole's color for a tile pedestal of 90x90 or 100x100 cm.

The protective cover of the Prostor P7 can be purchased as an option, this watertight cover protects your sunshade against all types of weather; it's painted in mass and is available in gray or black polyester canvas.

When the sun's gone, you can still enjoy sitting under your sunshade thanks to the dimmable Power-LED lighting. This addition can be added to the sunshade during production.

We've also thought of heating and up to 4 heating elements can be added to a single pole. The single or double outlet is mounted on the pole and the heating elements don't have to be removed when closing the sunshade.
