

OPEN THE SUMMER

Enjoying that holiday feeling in your own backyard is one of the best things there is. Enjoying it knowing that you're sitting comfortably might be even better! Whether you're sitting in our showroom enjoying a cup of coffee, at a restaurant's patio with a glass of white wine, or even at home with a good book, under a Solero sunshade you'll always be sitting just right. We'll explain to you exactly why.

LIGHTFASTNESS

The light- or colorfastness of our sunshades is largely dictated through the use of colors. The Solero sunshade canvases are painted down to the core of the fiber, for example like a carrot that's perfectly orange through and through. In comparison to other canvases that are painted AFTER being woven, giving them just a superficial coloring.

Cut a radish in half and you'll know what we mean: the outside is red, but the inside has no pigment whatsoever.

Our coloring method gives the canvas a great resistance against solar radiation, the black canvas will remain perfectly black for up to 4 years.

WATER COLUMN

Besides the lightfastness, the water repellent properties are an important factor of the canvas. Of course you'd want you and your guests to stay dry under the canvas during summer rain. This property is defined by the water column. A water column says something about the amount of water that a sunshade canvas can withstand before it starts to seep through. A water column of

300mm, like the Solero sunshade, means that the canvas will not allow water through until the pressure reaches the comparable weight of 30 cm of standing water. The water column indicates how many millimeters of water per square centimeter can be on the canvas before it starts to leak.

UPF-VALUE

Solero sunshades form a good protection against harmful influences of exposure to sunlight. With the decay of the ozone layer less and less ultraviolet radiation is filtered. This means a great quality canvas offering optimal protection becomes more and more important. All canvases filter 100% of the harmful ultraviolet radiation. We note this with a UPF factor of 50+

Exposure to too much ultraviolet radiation can discolor the skin to red, burn it, or even lead to skin cancer.

Sunshades made by Solero have a UPF value of 50+ and offer good protection, but always stay alert! Ultraviolet radiation is also reflected off the water, snow, glass and sand. Indirectly your skin will still be exposed to radiation.

Now you understand why we feel comfortable placing our sunshades on your patio with a warranty of 4 years of colorfastness, a 300mm water column and a UPF 50+ value. The same goes for our service, which often goes further than what we guarantee, so let the sun come out!

DGA HELGA VAN KEULEN

WELCOME AT SOLERO

“Welcome”, a word that’s often used but rarely experienced by the customer. Of course we’re consumers ourselves and see that there’s a lot left to be desired in terms of customer service. We try to look at our company from that perspective as well. What’s important to you, when do you feel understood and what could we do, as a company, for you?

At Solero we’re terrible at slick sales pitches, we’d rather invest that time in a real conversation to find out what the best possible options are for you. Of course we could use a lot of technical terms to impress you with our knowledge, but we’d rather explain it simply so we’ll both know exactly what we’re talking about. Whether you’re looking for a small Teatro sunshade for a balcony, or you need ten Basto giant sunshades for your restaurant’s patio, you’ll always have our full attention to give you honest advice. Whenever you call us you won’t run into a selection menu, but you’ll get connected directly to one of our colleagues who know how to help you. All of us know a lot, but together we have all the knowledge of our industry and of course, we know our customers.

It’s my goal to answer any questions the same day, and in most cases we succeed at just that. Quick and substantive responses are what we’re known for, and keeping someone waiting is absolutely unlike Solero. The fact that my colleagues call me a workaholic because of this is something I’ll gladly take for granted. I

won’t be satisfied until we’ve answered every question, completely and accurately, and have helped our customers to take the next step.

Of course it’s hard work, especially during the spring and summer we’ll work long hours. But we love doing it and grow enthusiastic of the often positive responses we receive. Becoming a big company has never been a goal, but we’re very proud of our five Gazellen Awards from the Dutch Financial Times (Financieele Dagblad); evidence that we’re one of the fastest growing companies in the Netherlands.

We’d love to come see you personally to provide you with our advice. Of course you’re also more than welcome to make an appointment to see our professional showroom in Best.

With kind regards,
Helga van Keulen

SOLERO SUBLIMO

200X200 CM AND Ø300 CM

The Sublimo has a contemporary and sleek design with beautiful lines that instantly add a dimension to your garden, balcony or terrace. This trendy parasol is equipped with four crossed ribs and is incredibly easy to operate. The Sublimo truly stands out above the crowd.

Each Solero parasol has its own character, and that certainly goes for the Sublimo. He's sleek, modern and has a specific, headstrong appearance. Using the unique push-up system, the Sublimo is opened in two seconds, after which you find yourself relaxing in the shade below the fade resistant square cloth measuring 200 x 200 cm ø 300 cm. For sublime relaxation.

The Sublimo is available in two sizes, the square 200x200 cm and the round 300 cm version. These parasols are equipped with a perfect fitting grey protection cover.

Every metal part of the Sublimo is anodized. With a special treatment, the metal is equipped with a slightly glossy layer that looks great and protects against corrosion and tear and wear.

The Sublimo can be securely fastened in several ways, for example, you can choose to go for a mobile, fillable pedestal, a ground anchor that can be settled in

the ground while pouring concrete, or a granite pedestal of 60 kg with wheels. It's your choice to pick whichever option is easiest for your patio.

The Solero Accento click-on lamp fits around the mast of the Sublimo, it's a nice addition that gives the sunshade just a little bit more appeal. When you point the lamp downwards you can easily read a book under it, but when you turn the Accento click-on lamp around you'll create indirect mood lighting, which is ideal to make the summer nights last a little longer.

Through the integrated rib springs the canvas always remains tight, on top of that the canvas is watertight and colorfast, we even warranty the colorfastness for 4 years!

SOLERO VATICANO

Ø250 CM

The Solero Vaticano is a unique combination of a refreshing yet classic design. This parasol only takes little space, while its wide span and swiveling cloth offer plenty of shade.

The Vaticano is an excellent add-on to virtually every decor style of your garden, balcony or terrace. The fade resistant O'Bravia cloth, guarantees years of pleasure from this stylish trendsetter.

The Vaticano looks classy and cheerful, the system operates handy and smoothly. The 24 flexible ribs ensure that the fade resistant cloth is always tensioned. Simply tilt the parasol to 45° to enjoy the shade, even when it's hanging low in autumn, exactly how you want it. Named after the dome in Vatican City, this parasol also does not take much room, while leaving a formidable impression with your guests.

It's rare for a parasol with a 250 cm. span width to be handled so lightly. The Vaticano is humble while being operated, but shows grandeur in its performance. And of course you'll receive a stylish grey protective cover with your order.

The Solero Accento click-on lamp fits around the mast of the Vaticano, it's a nice addition that gives the sunshade just a little bit more appeal. When you point the lamp downwards you can easily read a book under it, but when you turn the Accento click-on lamp around you'll create indirect mood lighting, which is ideal to make the summer nights last a little longer.

The Vaticano can be securely fastened in several ways, for example, you can choose to go for a mobile, fillable pedestal, a ground anchor that can be settled in the ground while pouring concrete, or a granite pedestal of 60 kg with wheels. It's your choice to pick whichever option is easiest for your patio.

The 24 ribs of the Vaticano keep the canvas nice and tight, even if the sunshade is tipped, this way the setting sun can be blocked out without having to worry about a little wind.

SOLERO TEATRO

Ø270 CM

The Teatro parasol is the smallest member of the Solero family. This garden parasol has a cloth diameter of 270cm. The parasol cloth is made of a solid, heavy quality and is guaranteed to be fade resistant.

The parasol cloth is made of a solid, heavy quality and is guaranteed to be fade resistant. After a number of years your blue parasol will be, well, still blue!

You can turn the Solero Teatro open and closed within a few seconds and the parasol is very easy to transport. So the Solero Teatro is also a welcome item at the campsite. But particularly in your garden, it will serve you well. Definitely with the Solero Accento click-on light.

The Solero Accento click-on lamp fits around the mast of the Teatro, it's a nice addition that gives the sunshade just a little bit more appeal. When you point the lamp downwards you can easily read a book under it, but when you turn the Accento click-on lamp around you'll create indirect mood lighting, which is ideal to make the summer nights last a little longer.

The canvas is made of a durable heavy quality and is guaranteed colorfast. Blue will remain deep blue, even after several years. Every fiber is colored individually before being weaved. On top of that, we'll provide you with a grey protective cover for your sunshade, free of charge.

The Teatro can be securely fastened in several ways, for example, you can choose to go for a mobile, fillable pedestal, a ground anchor that can be settled in the ground while pouring concrete, or a granite pedestal of 60 kg with wheels. It's your choice to pick whichever option is easiest for your patio.

SOLERO CIELO PLUS

260X260 CM

*The Solero Cielo plus just belongs at home in your garden. This heavy, cantilever parasol has a 260cm*260cm diameter. With its innovative control system you can open or collapse this quality parasol in a flash.*

It's very easy to put this parasol into different skewing positions, without having to use the least bit of force.

The firm base of the Cielo parasol is equipped with a clever turning mechanism. You can rotate this garden parasol easily and in 360 degrees by simply pressing the foot pedal. By releasing this pedal, this handy floating parasol will be automatically locked in its position.

With the Cielo Plus comes the Solero Accento. This fantastic Solero Accento is provided with a charger. Using this, you can charge high quality batteries in a matter of hours. With the Cielo Plus parties can last longer, and it'll remain

cozy for much longer.

The Cielo Plus by default is delivered with a set of free cross feet. Would you like to anchor the sunshade on your patio? In that case you can order the special ground anchor.

The canvas is made of a durable heavy quality and is guaranteed colorfast. Black will remain deep black, even after several years. Every fiber is colored individually before being weaved. On top of that, we'll provide you with a grey protective cover for your sunshade, free of charge.

SOLERO LATERNA

300X300 CM AND Ø350 CM

Lounging, reading and relaxing on your terrace? Or enjoying those nice summer days with friends and family? The Laterna will bring your holiday to your own garden.

By using exclusively high quality materials we promise you'll enjoy your luxurious floating sunshade for years to come.

Due to its generous size (300x300 cm or Ø 350 cm) this sunshade turns any outdoor area into a welcoming space for large and small groups. Despite its size, it's easy to handle and can be moved into any position with the one smooth move. Would you prefer not to have an unsightly pedestal or heavy tiles on your patio? This sunshade can be anchored into the ground quickly and aesthetically.

The Laterna is delivered with a silver frame and comes with a complimentary protective cover. You'll also receive a wireless, rechargeable free lighting! The Laterna parasol cloth is kept tight in a beautiful way by its integrated rib ends.

With this luxurious floating sunshade you'll get the maximum ease of use in your garden. The sunshade has an intuitive control rod that allows effortless opening, closing and tilting. You can also rotate the sunshade 360 degrees.

You'll always stay cool under the Solero Laterna. The square version is outfitted

with a special wind ventilation roof. The round version has a wind catcher as well, but this isn't lifted up as high from an esthetical point of view.

On (too) hot days the canvas also releases heat instead of capturing it under the sunshade. On top of that, this helps the sunshade gain stability. When wind flows under the sunshade it'll easily be released.

With the Solero Laterna you'll have different fastening options: a tile pedestal, ground anchor or borrowing pedestal. You can also secure the sunshade to an existing concrete floor with an adaptor plate. The tile pedestal can be expanded with swiveling wheels allowing you to easily move it around.

So if you like to lounge, read and relax on your patio? Or enjoy beautiful summer days with friends? With the Laterna you'll be on holiday in your own backyard. By using exclusively high quality materials we promise you'll enjoy your luxurious floating sunshade for years to come.

SOLERO FRATELLO

300X300 CM

A magnificent Italian design with remarkable functionality. Able to turn a full 360° around its outer axis and tilt 45° both sideways as backwards, the Fratello offers endless possibilities to utilize your exterior to the max.

As the big brother of our successful Laterna parasol, the Fratello (Italian for 'brother') gains respect by its endless possibilities. It follows the sun by tilting to every side and comes with a stylish silver grey frame. With its 300 x 300 cm. size, you know that all your guests will rest assured under this strong arm with its perky character.

The free hanging design of the Fratello, ensures that this large parasol works quite discretely for you. Enjoy the shade and cover, while the mast is hardly visible yet stylishly present. And of course the integrated winch is operated elegantly.

The special Solero O'Bravia sunshade canvas is made of durable, heavy quality and is also colorfast.

With the Solero Fratello you'll have different fastening options: a tile pedestal, ground anchor or borrowing pedestal. You can also secure the sunshade to an existing concrete floor with an adaptor

plate. The tile pedestal can be expanded with swiveling wheels allowing you to easily move it around.

SOLERO PATIO

300X300 CM

Are you looking for a great quality design parasol for an affordable price? The Solero Patio parasol is the best choice around, showing that a sleek design can be very attractive.

This design parasol has a solid frame with a powder coated pole that has a 50mm diameter. Of course you can choose from a wide range of trendy fade-resistant cloth colors.

This square parasol is handled just as easy as our other models. The Patio forms a perfect protection from the sun for the hospitality industry. No doubt about it, this is a true eye-catcher, especially when combined with the Solero Accento click-on lighting.

The Patio parasol cloth is kept tight in a beautiful way by its integrated rib ends.

The special Solero O'Bravia sunshade canvas is made of durable, heavy quality and is also colorfast. Blue remains a deep blue and doesn't fade after two seasons. The sunshade canvas keeps its tension through the tensioners in the ribs. The Patio is delivered with a free protective cover and can be placed with a pedestal or a ground anchor.

A real eye catcher, especially combined with the Solero Accento click-on lighting. A sunshade you'll enjoy for years to come!

SOLERO PRESTO

330X330 CM AND Ø400 CM

Presto Italian for 'quick', the newest edition to the Solero hospitality parasols lives up to its name. With the unique easy-turn system the Presto is opened in a flash.

Collapsing it is even done almost fully automatic. As soon as you release the button, the Presto parasol instantly slides back into its closed position. An ideal solution for the hospitality industry, it truly helps you get home quickly after a long day of work!

The biggest advantage of the Presto is the closing height, this is the distance from the ribs to the ground. The Presto has a telescopic frame that's often used in hospitality, allowing the sunshade to essentially rise up the moment it's closed. This allows tables and chairs to remain under the sunshade when it's closing.

Using just two fingers you can open and close this sunshade, ideal for hospitality where everybody needs to be able to open or close the sunshade. We're definitely not forgetting about the users who have less strength in their hands, the Presto is definitely a good choice for this group of users as well.

With the easyturn knob you'll really open the sunshade in just 2 seconds. Closing it is almost automatic. As soon as you turn the knob back, the Presto sunshade will slide into the closed position. The Solero Presto is delivered with a robust mast of 63mm with a chic silver gray finish.

The special colorfast canvas of the Presto is, just like our other canvases, outfitted with a water repellent coating. The Presto sunshade is also 100% recyclable. Good for the environment, and great protection for you. The canvas has a UPF value of 50+. Of course you'll receive a protective cover with your sunshade to be able to store it safely on the moments you're not using it.

SOLERO PALESTRO

300X400 CM AND 400X400 CM

Eat, drink, talk, play, enjoy, that's what your garden is for. The Palestro improves these experiences. This floating parasol turns over your dining table and over the lawn for your children

The Palestro turns above the terrace to linger in the evening. And of course it's fully kids proof, as it's securely mounted with its ground anchor.

A modern design that still fits in every backyard. Robustly designed to be able to take a hit and with a colorfast canvas that'll last for years. It has a large size, a surface of 12 or 16 square meters, allows everyone to find their favorite spot in the shade.

A sleek design that fits in every garden. The large 400 x 400 cm. cloth ensures that everybody finds its favorite place in the shadow. Its robust design ensures it can stand a rough handling and the fade resistant cloth that looks brand new for years. The Palestro is an add-on for the entire family, that quickly becomes a part of your outside.

The Palestro proves that being big and beautiful doesn't have to be hard. With the nifty rotating mechanism and supple winch you'll turn and tilt this sunshade easily in any direction. That way you'll easily enjoy all of its qualities.

The Solero O'Bravia canvas is of the absolute best quality and guaranteed colorfast. Even after several warm summers, your Palestro will look as good as new.

The fantastic Solero Accento lighting is delivered with the Palestro and is provided with a charger. Using this, you can charge high quality batteries in a matter of hours. With the Cielo Plus parties can last longer, and it'll remain cozy for much longer.

SOLERO MAESTRO PRESTIGE

300X400 CM AND 400X400 CM

Are you looking for a large square parasol for the hospitality industry? One with a fade resistant cloth and a solid appearance?

Preferably one with a great quality and a low pricing that is easy to handle? The Solero Maestro Prestige parasol makes for a great offer for just that need!

The Maestro Prestige forms a perfect protection from the sun for the hospitality industry. This square parasol has a very large surface, but is handled just as easy as our other models. A waiter or waitress will be able to open or close this parasol in a flash.

Many patios home and abroad are covered by the Maestro Prestige. The special O'Bravia canvas is of a durable, heavy quality, colorfast and waterproof. The Maestro won't change colors after several seasons.

The frame is made of aluminum and if necessary, you can attach gutters against the rain. That way you and your guests can enjoy your patio under the waterproof sunshades.

The Maestro sunshade is equipped with a telescopic mast, this means that the mast lowers when it's opened and rises when it closes. A big advantage, especially for hospitality, is that furniture doesn't have to be moved, it can just stay in place.

The Maestro Prestige always beats out the sun and is used a lot in hospitality. This solid sunshade can be opened effortlessly and you can easily place multiple against one another. Swiveling wheels and separate canvases are available as well.

The Maestro Prestige is perfect to get printed on as well; logo's and text will be legible and can be printed on in our shop, ask us for your options and pricing!

The Maestro is so easy to use that everyone can do it. Because of that, the control rod can be removed so that you alone can open or close the sunshade when necessary.

SOLERO BASTO

400X400 CM AND 500X500 CM

How does one look at your terrace from afar? The remarkable and robust appearance of the Basto radiates taste and quality. The unique character of this parasol, operated very smoothly with its detachable winch, adds a great deal of appeal.

A sleek design with straight lines, that also looks marvelous while looking upwards to its eight stylishly decorated ribs. And it's a big one, as the squarely designed Basto is available in the sizes 400 x 400 cm. and 500 x 500cm. Thus your guests enjoy your class all together, long after the sun has set.

The colorfast O'Bravia canvas with 300 grams thickness is especially robust and guarantees years of worry- and maintenance free enjoyment. This large surface is easy to operate. Sometimes style and efficiency do go very well together.

Even after several seasons the sunshade will not discolor. The frame is made of a heavy aluminum construction and if you require it can have gutters attached to protect against the rain.

Would you like your company name or logo in the spotlight? That's possible. The canvas of the Basto hospitality sunshade is perfect for printing on. The Basto is equipped with a telescopic mast, that means the mast slides down when being opened, and up when being closed. This allows the sunshade to open and close above a table. A large advantage for hospitality entrepreneurs because tables and chairs don't have to be constantly moved when opening or closing the sunshade.

The frame of the Solero Basto is made out of high quality aluminum. It's relatively lightweight and is very strong, the material also lasts against corrosion and is recyclable.

The control rod allows the operation of the winch, it applies pressure to the cables or relieves it. By why a removable control rod? Especially in hospitality it's a good idea to remove the control rod from the sunshade so it can't easily be stolen, or have unauthorized people operate the sunshade.

When purchasing the Basto you'll receive a gray protective cover free of charge, which is equipped with a dirt- and water resistant coating and a modest logo.

PROSTOR P4

Ø270 CM

In some situations it's not desirable or even possible to anchor a parasol in your terrace. This might be solved by using a mobile parasol base, but this often turns out to be in everyone's way.

Especially if you want to use every inch of your terrace or balcony, the solero wall parasols make for a great alternative.

The Solero Prostor P4 wall parasol will always be delivered to you with a built-in pressured gas spring. This allows for a very smooth handling! Using the handle this unique wall parasol can be fixed into a horizontal position with a touch. Additionally you can also extend the length of the black handle from 140 up to 180 cm.

Our patented 'Easy Opening System' makes using this sunshade easy and will help save on space. By using the telescopic arm the sunshade can be extended 140 to 180 cm from the wall. The Prostor P4 can be tilted horizontally up to 10 degrees, which can be very useful with a setting sun.

The canvas of the sunshade is 100% Olefin and is painted in the mass, it weighs 190 grams per square meter and has a colorfastness of 7-8 on a scale of 8. Olefin is water resistant and filters over 97% of UV radiation; this is expressed as UPF 40+. The canvas can be washed and if necessary is easy to replace.

The arm and the frame of the sunshade is finished in anodized aluminum, making the sunshade lightweight and a real eye catcher in your backyard. A protective cover is provided free of charge, this allows you to greatly lengthen the lifespan of this nice wall mounted sunshade.

PROSTOR P6

250X250 CM, 300X300 CM AND Ø350 CM, Ø420cm

CLOTHS

The Solero Prostor is much more than just a parasol, it's an easily retractable canopy with a lot of features. The setup consists of a central pole which can be accommodate up to four parasols.

Using the patented control system, including a gas spring, the parasols are easily collapsed. You can open or collapse every cloth individually.

Solero Prostor comes with a sound aluminum mast that allows 1, or up to 4 canvases to be mounted. Opening and closing is as simple as it's genius. With the one-move system the sunshade slides into the open position. You don't have to be really strong to open this! The canvas is 100% acrylic and is painted in mass, it weighs 290 gram per square meter and has a colorfastness of 7-8 on a scale of 8.

Acrylic is water resistant and filters out 95-100% of UV radiation, expressed as UPF 50+. The canvas is washable and if necessary easy to replace.

The controls are extra light thanks to the steel gas spring that compensates the weight of the sunshade. Do you want to use the sunshade in a wet- or sea climate? Then the optional stainless steel gas spring is definitely recommended.

This sunshade is available as a wall-mounted sunshade in single or dual variations. The pole can be easily mounted to the wall with 2 brackets. That way you can enjoy a stylish sunshade with a pole or tile pedestal. Unfortunately this isn't possible for our round variations.

The framework for this sunshade is RAL 9007 by default, this is a gray structured lacquer as shown in the photo. It's possible to get a black or white frame in case you need it, but this will have an additional cost and a longer lead

time. You'll have the choice of RAL 9016 (white matte) or RAL 9005 (black, matte), Alucopper and Alupolished.

Move your sunshade around effortlessly thanks to the swiveling wheels with brakes, this is only available for the P6 Uno sunshade.

Optional for the Prostor p6 tile pedestal is an aluminum cover, lacquered in the pole's color for a tile pedestal of 90x90 or 100x100 cm. The protective cover of the Prostor P6 can be purchased as an option, this watertight cover protects your sunshade against all types of weather; it's painted in mass and is available in gray or black polyester canvas.

It's also possible to connect your sunshades through rain gutters, these are attached through zippers which are on the canvas of your sunshade by default.

When the sun's gone, you can still enjoy sitting under your sunshade thanks to the dimmable Power-LED lighting. This addition can be added to the sunshade during production.

We've also thought of heating and up to 4 heating elements can be added to a single pole. The single or double outlet is mounted on the pole and the heating elements don't have to be removed when closing the sunshade. Do make absolutely sure the heaters have completely cooled down so that it won't burn a hole in the canvas.

PROSTOR P7

250X250 CM, 300X300 CM AND Ø350 CM, Ø420CM

CLOTHS

The Solero Prostor P7 wall parasol is available in three sizes: two square editions of 250cm and 300cm and a round version with a 350cm diameter.

No matter which size you choose, the P7 wall parasol is always easily handled. With the integrated gas spring supporting you, you'll open and collapse the parasol in a flash.

Despite of its size, the Solero Prostor P7 is very easy to move left or right. As the weight of this space saving parasol is smartly shared between the top and bottom rotating brackets, you'll instantly move the shadow to where you want it to be.

The canvas is 100% acrylic and is painted in mass, it weighs 290 gram per square meter and has a colorfastness of 7-8 on a scale of 8. Acrylic is water resistant and filters out 95-100% of UV radiation, expressed as UPF 50+. The canvas is washable and if necessary easy to replace.

The controls are extra light thanks to the steel gas spring that compensates the weight of the sunshade. Do you want to use the sunshade in a wet- or sea climate? Then the optional stainless steel gas spring is definitely recommended.

The framework for this sunshade is RAL 9007 by default, this is a gray structured lacquer. It's possible to get a black or white frame in case you need it, but this will have an additional cost and a longer lead time. You'll have the choice between RAL9007 (grey), RAL 9016 (white matte) or RAL 9005 (black, matte), Alucopper and Alupolished.

The Prostor P7 can be mounted to the wall with 2 adjustable brackets. The P7 wall sunshade has an optimal turn when mounted on a corner. The locking axis helps lock the sunshade down so it doesn't turn in the wind.

Move your sunshade around effortlessly thanks to the swiveling wheels with brakes, this is only available for the P7 Uno sunshade. Optional for the Prostor P7 tile pedestal is an aluminum cover, lacquered in the pole's color for a tile pedestal of 90x90 or 100x100 cm.

The protective cover of the Prostor P7 can be purchased as an option, this watertight cover protects your sunshade against all types of weather; it's painted in mass and is available in gray or black polyester canvas.

When the sun's gone, you can still enjoy sitting under your sunshade thanks to the dimmable Power-LED lighting. This addition can be added to the sunshade during production.

We've also thought of heating and up to 4 heating elements can be added to a single pole. The single or double outlet is mounted on the pole and the heating elements don't have to be removed when closing the sunshade.

PROSTOR CABANA

350X350 CM AND 350X300 CM

You would love to have a system which you can use the whole year through? This Cabana is the answer to your desires.

This summery roof from Prostor is delivered as a semi ready package, so it's easy to move around. Available in 350x350 cm and 350x300 cm and delivery from stock.

The Solero Cabana is a roof that quickly gives your backyard a lot extra.

The frame is powder coated with a white structure coating, all profiles are 100% extruded aluminum. The material of the roof is wit waterproof PVC-canvas (650gr/m²), the height of the structure is 2300mm and the frame color is RAL 9016.

Thanks to the superior quality of the PVC-canvas you can enjoy your Cabana in any type of weather, it offers protection against both the sun and rain.

L-PROFILE

The specially developed L-profile can be bolted into the ground under the feet of the Cabana. This way the pergola is steady on its feet and nearly all screws and bolts are removed from sight.

ROOF PROFILE

The plate cover is an option for the Cabana, it protects the PVC-canvas of your Cabana against rain, dirt and dust the moment your canvas is folded in. This profile is white lacquered in the color of the frame and canvas.

OPENING WITH JUST ONE HAND

The Cabana's system is light as a feather. You can easily open and close the canvas. This way you effortlessly direct the shadow to where you want it to go. On top of that, the canvas is waterproof. No more moving around tables and chairs, this great lounge area offers good cover, even during summer rains.

SOLERO HEATING & LIGHTING

It's been a nice day, the sun is slowly setting and it's starting to cool down. With the help of heating and lighting we can bring back the sun for a little while on the patio or in your backyard.

Our patio heaters are perfect for use in hospitality but are also available for consumers. They create a comfortable atmosphere and are available in multiple colors, the design isn't ostentatious but looks stylish.

The great thing about infrared lights is that they warm people, instead of air, this means there's no lead to build up heat and effective heat is created immediately after turning it on.

An added advantage is that 92% of the electricity is converted to heat.

The heaters are easy to install, easy to direct and suitable both in- and outdoors, the machine is lightweight making it very easy to move.

We also thought about the environment, working with infrared means there's no exhaust gases; there's no use of oxygen after all. There's no (direct) CO2 emission and while in use there's no pollution or noise through air- and dust circulation.

The heaters are splash proof and made of weatherproof aluminum, the special isolation prevents overheating of the housing and the grate at the front prevents touching of the halogen lamp. There's no blinding through the use of filtered lamps. Each lamp has around 5000 hours of use.

SOLERO HELIOSA 11

The new Solero Heliosa 11 is a waterproof heater (IPX5) with a 1500 WATT amberlight bulb. Amberlight has 80% less light output than standard heating elements, and creates a pleasant atmosphere. A 5 meter cable, and a parasol bracket are included with the Heliosa 11 heater. For heating areas 12-15 m2 / 129.17-161,46 ft².

SOLERO HELIOSA 44

The new Solero Heliosa 44 is a waterproof (IPX5) heater with a 2000 WATT amberlight bulb. Amberlight has 80% less light output than standard heating elements, and creates a pleasant atmosphere. A 5 meter cable is included. The parasol bracket can be ordered separately. For heating areas 15-20 m2 / 161,46-215,28 ft².

SOLERO HELIOSA 66

The new Solero Heliosa 66 is a waterproof (IPX5) heater with a 2000 WATT amberlight bulb. Amberlight has 80% less light output than standard heating elements, and creates a pleasant atmosphere. A 5 meter cable is included. The parasol bracket can be ordered separately. For heating areas 20-25 m2 /

SOLERO HELIOSA POLE MOUNTING BRACKET

This mounting bracket is specially made to mount the Heliosa heaters on a round or square pole. The bracket can be used for a pole up to 100mm.

SOLERO HELIOSA REMOTE CONTROL

This wireless remote control has two programmable channels, and can operate up to 3500 WATT. With this remote control, you can control two 1500 WATT heaters simultaneously. (IP45)

SOLAMAGIC V4

The V4 is sunshade lighting with 4 spots, each with 50 Watts of power. Because of the clever design, with just one step you easily mount 4 spots on your sunshade. The V4 weighs 3 kg and is easy to mount because of that. The connecting cable can be ordered separately in 5 or 10 meters, and black or white. This lighting can be mounted on every mast with a diameter between 45-89 mm. Extra lamps are available as well.

SOLERO ACCENTO

The easiest way to shine some light in the darkness is through the use of the cordless Solero Accento. It comes standard with the purchase of a free hanging garden sunshade, but it can be ordered separately as well. The Accento fits around masts with a diameter between 34-50 mm and is rechargeable.

SOLERO LUX

The Solero Lux is a new stylish parasol light with LED. This LED light has a built-in battery and can be easily installed with a 3M magnetic strip. The Solero Lux contains 4 LED strips (with built-in battery), 4x USB charger, a 3M magnetic strip, and a 4-way USB charger to charge the 4 LED strips simultaneously.

GUTTERS, COVERS AND CANVASES

It might not be the first thing you think of, but that doesn't make it any less important: the gutters, covers and canvases for your sunshade.

Like no other, we understand how important it is to get a good cover with your sunshade. You'll protect the canvas against the weather and will help keep your canvas as new.

After a few years you might be done with the color of your sunshade, in that case we can help you with a replacement canvas. We have all canvases in stock and can be easily exchanged.

We do have cases where a truck hits a hospitality sunshade, accidentally bending the ribs. This is extremely difficult because it immediately makes your patio look poor. In most cases however, we thankfully have spare parts available or if necessary order new parts which would be ready within 1 week. This goes for a replacement canvas, or a complete mast, as well. These parts are in stock, so that we'll be able to deliver quickly to you.

RAINGUTTERS

The easiest way to connect sunshades is through canvas gutters, they're often called rain gutters too. We offer 2 types of canvas gutters; the Solero PVC canvas gutters, and the Prostor canvas gutters. The Solero PVC canvas gutters are fastened through clasps that click in place, which are mounted by screwing them into the ribs, they're available in all lengths and in the colors natural, gray and black, the width of these gutters is 60 cm maximum. The Prostor canvas gutters work with a zipper and are available in 2 lengths: 250cm or 300cm in the exact color of your sunshade's canvas.

PROTECTIVE COVERS

Indispensable to keep the canvas of your sunshade in good condition: the protective cover.

A protective cover is available for every type of sunshade, the Solero covers are provided free of charge when buying a sunshade, but are available separately as well. We don't offer any warranty on these covers because of the severe weather they're open to. The covers in the Prostor collection are made of a heavier quality and are available in the colors black or gray.

SOLERO SUNSHADE CANVASES

Despite the unmatched quality of the Solero O'Bravia canvas it does happen that a canvas needs to be replaced. Sometimes the weather takes hold and it's hard to remove the stains. Especially because of this we offer separate canvases, which include 4 years of colorfastness warranty, so that you're ensured of years of a deeply colored canvas. Our canvases protect against UV-radiation, are waterproof and above all colorfast. Different sizes and colors are available.

PROSTOR SUNSHADE CANVASES

Just like the Solero canvases, it can happen that a canvas needs replacement with the Prostor series. That's why we also offer the Prostor Acrylic and Olefin canvases separately. After your purchase you'll again have 4 years of warranty on the color fastness, so that you're ensured of years of a deeply colored canvas. The Prostor canvases protect against UV-radiation, are waterproof and above all colorfast. Different sizes and colors are available.

PRINTING

Especially companies dealing in hospitality like to have their company name or logo printed on their sunshade, to increase the recognizability of their patio. Printing on a canvas takes quite some effort, that's why we'll gladly do it for you. We work with the best printers who work carefully and pay close attention to get a beautiful result that fits with your style.

Solero uses two methods to print a logo or text on canvas; plotting and screen printing. Plotting means that the logo is cut from foil and pressed onto the canvas with heat. This is done under high temperatures so that the glue of the foil binds properly to the canvas. Because of the immense heat on the material, a printer can't heat the same piece of cloth more than 3 or 4 times, otherwise the canvas would shrink.

In those cases, screen printing offers a solution, because it doesn't use any heat.

With screen printing a screen is put over a frame while the ink is pressed through the open parts of the screen. The screen is based on a template of the logo that needs to be used on the canvas.

Both methods are used regularly by us, but in the long term a logo that's been screen printed remains brighter and better. Each method has it's pros and cons, so we've put them side by side for you below.

THE ADVANTAGES OF PLOTTING:

- Quick turnaround of 1 week
- Cheaper in smaller quantities
- Printing is colorfast
- Metallic colors are an option

THE DISADVANTAGES OF PLOTTING:

- Limited choice of colors
- A logo with many colors is not possible (>3 colors)
- Plotting is more sensitive to UV-radiation than screen printing

THE ADVANTAGES OF SCREEN PRINTING:

- A great price when ordering many (>40 logos)
- All colors available
- Printing is colorfast

THE DISADVANTAGES OF SCREEN PRINTING:

- It's very costly with smaller quantities
- Delivery time is around 2 to 3 weeks
- Impossible to do large prints

Each logo is different and because of that it's difficult to give a good pricing indication without having seen the logo first. Because of that, we always ask that you send us the logo in EPS format, so we can request a proof from the printer and make a good offer for you. We're a great partner for larger projects, and starting at 100 pieces the prices will, of course, be a lot better. A large project does increase the lead time.
